

GE Healthcare works with its suppliers to ensure compliance of articles imported or manufactured within the European Union that are subject to the REACH regulation (EC- No 1907/2006), Article 33, and used in the production of GE Healthcare products.

Regarding the application of Article 33 of the REACH regulation and the publication of the Candidate List of Substances of Very High Concern (SVHC) according to Article 59 of REACH regulation, GE Healthcare is aware of its legal obligations and will comply with them.

GE Healthcare articles do not "intentionally release" substances under normal conditions of use. Based on information from our suppliers to date, these substances are present in the following products at a concentration greater than the threshold of 0.1% (w/w) at the article level:
